

Selection of Vector DB Solutions out of Market

Criteria for selection of a Vector DB option:

- Storage options- space, retrieval (fast/slow acceptable) etc.
- Scalability requirements
- Expected dependence on hybrid queries
- Data security: Where to store data- in-prem or in a public/hybrid cloud

Target options to choose out of:

- Cloud or standalone (in-prem, private)
- Domain-specific or general (“large” as in “large language model”)
- Cluster or embedded
